Coimbatore, Tamil Nadu, India

Summary

Aspiring Front-End Engineer with hands-on experience building responsive, component-driven web applications and 3 industry internships in front-end development, AI/ML, and backend engineering. Skilled in React, JavaScript (ES6+), HTML5, CSS3, and RESTful API integration — passionate about crafting scalable, user-centric digital experiences informed by design thinking.

Education

B.E. Computer Science and Engineering

Sri Ramakrishna Engineering College, Coimbatore

Sep 2023 – May 2027
CGPA: 8.74 / 10 (till 5th Semester)

HSC - 12th Grade

Bharatiya Vidya Bhavan Matric Hr. Secondary School, Coimbatore

May 2022 – Mar 2023
Score: 95.5%

SSLC - 10th Grade

Angappa CBSE Senior Secondary School, Coimbatore

Jun 2020 – Mar 2021
Score: 93.4%

Experience

Front-End Development Intern

Raarya Property Developers, Coimbatore

Jun 2025 – Jul 2025
Stack: React.js, JavaScript (ES6+), HTML5, CSS3, MongoDB

- Developed a **responsive, multi-module property website** using **React.js, HTML5, and CSS3**, implementing **6 interactive UI modules** (Buy, Sell, Rent, Analytics, Financial Services, User Interaction) with full cross-device compatibility across desktop, tablet, and mobile.
- Integrated a **MongoDB database** for unstructured property data and built **RESTful API hooks** for dynamic content rendering - adding EMI, mortgage calculators, and price-range filters, improving data load efficiency by **30%**.

AI & Machine Learning Intern

Infosys

Oct 2025 – Dec 2025
Stack: PyTorch, U-Net, Python

- Designed and trained a custom **U-Net-based binary image segmentation model** in PyTorch, achieving **84% segmentation accuracy** and reducing manual subject detection effort by over **60%** across the processing pipeline.
- Automated end-to-end subject extraction workflow, improving image processing throughput by **3×** with deployment-ready inference output.

Software Development Intern

HCL Tech

Dec 2024 – Jan 2025
Stack: Java, Spring Boot, SQL, JPA/Hibernate

- Developed a full-stack **Library Management System** using Java Spring Boot with MySQL, implementing **CRUD operations** across **5+ modules** and improving data handling efficiency by **35%**.
- Designed normalized schemas using **JPA/Hibernate** and built **RESTful APIs** serving **10+ endpoints**, enabling **40% faster data retrieval** and reliable client-server communication.

Projects

NeuroOps: AI-Powered Industrial HMI Dashboard | React 18, TypeScript, ES6+, Claude API, Vite

May 2026

- Industrial operators managing 6 plant metrics lacked real-time AI guidance, causing slow alarm response and poor situational awareness - built a **component-based React 18 + TypeScript** HMI dashboard with **ES6+, Vite**, and Anthropic Claude API delivering role-specific guidance across 3 operator profiles via a **responsive, context-aware UI** - reducing alarm response time by **40%**.
- Critical alarms had no structured resolution workflow, risking missed escalations - architected a full **alarm lifecycle** (Active → Acknowledged → Resolved) with **RESTful API integration**, Web Speech API voice alerts across **5 equipment types**, and complete audit trail logging -improving critical decision accuracy by **35%**.

Student Feedback & Management System | HTML5, CSS3, JavaScript, Bootstrap, Node.js, MySQL

Apr 2026

- Manual paper-based feedback collection across departmental events placed a recurring burden on faculty with no centralised record or submission tracking - developed a **three-tier web application** with an **HTML5/CSS3/Bootstrap** frontend, Node.js backend, and MySQL database, replacing physical forms and enabling digital submission for all users.
- Inconsistent data entry and zero visibility into submission status made report generation manual and error-prone -implemented **role-based access** (Student / Faculty / Admin), **client-side form validation**, real-time submission tracking, and a faculty management dashboard - reducing administrative effort by **40%** and establishing a **centralized, traceable record system**.

Skills

- Front-End:** React 18, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Java, Bootstrap, Responsive Web Design, Component-Based Architecture, OOJS
- Tooling & Platforms:** Git, GitHub, Vite, Babel, ESLint, Jest, Postman, VS Code, Docker
- Back-End & Databases:** Node.js, Java, Spring Boot, Flask, MySQL, MongoDB, RESTful APIs, Microservices
- AI/ML:** PyTorch, Scikit-learn, FastAPI, Python, Gen-AI

Certifications

- AWS Certified Cloud Practitioner**

Jun 2025
