Coimbatore, Tamil Nadu, India

Summary

Aspiring Software Engineer with strong foundations in **C/C++**, data structures, and memory management, backed by 3 industry internships in AI/ML and backend engineering. Experienced in building **compute-intensive pipelines**, modular software systems, and deploying ML models — keen to contribute to **parallel programming**.

Education

B.E. Computer Science and Engineering <i>Sri Ramakrishna Engineering College, Coimbatore</i>	Sep 2023 – May 2027 <i>CGPA: 8.72 / 10</i>
HSC – 12th Grade <i>Bharatiya Vidya Bhavan Matric Hr. Secondary School, Coimbatore</i>	May 2022 – Mar 2023 <i>Score: 95.5%</i>
SSLC – 10th Grade <i>Angappa CBSE Senior Secondary School, Coimbatore</i>	Jun 2020 – Mar 2021 <i>Score: 93.4%</i>

Experience

AI & Machine Learning Intern <i>Infosys</i>	Oct 2025 – Dec 2025 <i>Stack: PyTorch, U-Net, Python</i>
- Designed and trained a custom U-Net–based binary image segmentation model in PyTorch, achieving 84% segmentation accuracy and reducing manual subject detection effort across the processing pipeline. - Automated end-to-end subject extraction workflow, improving image processing throughput by 3× with deployment-ready inference output.	
AI/ML Intern – AICTE <i>IBM SkillsBuild Edunet Foundation</i>	Jul 2025 – Aug 2025 <i>Stack: Scikit-learn, IBM Cloud Lite, Python</i>
- Built a Predictive Maintenance system using ML classification models (Random Forest, SVM) to forecast 3+ failure categories — tool wear, overheating, and power faults — achieving over 88% classification accuracy. - Deployed AI models on IBM Cloud Lite to process real-time industrial sensor data, delivering predictive maintenance alerts and reducing projected unplanned downtime by 30%.	
Software Development Intern <i>HCL Tech</i>	Dec 2024 – Jan 2025 <i>Stack: Java, Spring Boot, SQL, JPA/Hibernate</i>
- Developed a full-stack Library Management System using Java Spring Boot with MySQL, implementing complete CRUD operations across 5+ modules and improving data handling efficiency by 35%. - Designed normalized database schemas using JPA/Hibernate and built RESTful APIs serving 10+ endpoints, enabling faster data retrieval and reliable client-server communication.	

Projects

NeuroOps: AI-Powered Industrial Control System Interface <i>React, TypeScript, Claude API</i>	May 2026
- Industrial operators managing 6 plant metrics lacked real-time AI guidance across roles, causing slow alarm response and poor situational awareness on the shop floor. - Built an AI-driven HMI dashboard integrating Anthropic Claude API as a real-time copilot with role-specific guidance across 3 operator profiles, a context-aware UI, and SCADA telemetry simulation — reducing operator alarm response time. - Architected full alarm lifecycle management (Active → Acknowledged → Resolved) with complete audit trail logging and Web Speech API voice alerts across 5 equipment types, improving critical decision accuracy by 35%.	
MCP Server for Hospital Data Integration <i>HL7/FHIR, DICOM, Docker, Python</i>	Aug 2025
- Hospitals using 2+ disconnected clinical systems (EHR and PACS) had no standardized real-time data exchange, causing delays in patient record access and zero imaging traceability across departments. - Developed a Model Context Protocol (MCP) Server with GE Healthcare, integrating HL7/FHIR (HAPI FHIR) and DICOM (Orthanc PACS) pipelines via Dockerized microservice deployment — cutting integration setup time by 40% vs. manual configuration. - Integrated LLM-powered clinical querying using Perplexity Sonar Pro, enabling real-time retrieval and analysis of patient data across FHIR and DICOM systems.	

Skills

- Languages:** Java, C, C++, Python
- Frameworks:** Spring Boot, Flask, FastAPI, PyTorch
- Web & API:** RESTful APIs, Microservices, HTML, CSS, JavaScript
- Databases:** SQL, MySQL, JPA/Hibernate
- Tools, Platforms & Technologies:** Git, GitHub, Docker, Postman, VS Code, IntelliJ IDEA, OpenCL, CUDA, Render script

Certifications

AWS Certified Cloud Practitioner <i>Amazon Web Services</i>	Jun 2025
